TELEGRAPHIC NEWS BRIEFLY CHRONICLED

Rail Unions Will Seek Gov't Aid

(By Canadian Press in Calgary Herald)

Montreal, June 22. — Some 100,000 members, comprising the combined railway unions, will ask the Dominion government to intervene in the present wage dispute, it was learned here on Friday.

With the final notices served on the maintenance of way men, whose membership includes all types of section workers to the number of about 35,000, every type of rail worker is included under the new proposed cut of 10 per cent.

The new reduction is the second in a year and a half, and will bring the total reduction to 20 per cent when it goes into effect the middle of July.

Currency Stabilization May Be Postponed

(By George Hambleton in the Calgary Herald.)

London, June 22.—The British attitude toward the refusal of the United States to consider currency stabilization at the present time is that it merely means postponement, not abandonment of this vital question.

Britain May Buy 50,000 Canadian Hogs Weekly

(By Canadian Press in Calgary Herald.)

Brandon, Manitoba, June 23.—Great Britain has agreed to take 50,000 hogs a week from Canada for the next five years, providing this Dominion can produce the right kind of hogs, Hon. D. G. McGregor told delegates to the annual convention of the Western Manitoba board of trade.

Removal Russian Embargo Would Hit Canada Trade

(By Lukin Johnston in Calgary Herald)

London, June 24.—The livelihood of tens of thousands of Canadian workers may be vitally affected by moves at the world conference. Wheat and lumber are primary products concerned.

The meeting arranged for Monday between Sir John Simon and Maxim Litvinov, Russian delegate, should rivet the attention of Canadian lumbermen. It is taken for granted the British embargo on Russian imports will be the chief subject discussed. No sudden ending of the embargo, which does not expire until July 19, is anticipated, but should it come about as the result of this first step, an extremely serious blow would be dealt the Canadian lumber trade, which has benefited enormously from the embargo.

Veteran 101 Years Old Asks Pension

(By Canadian Press in Calgary Herald)

Oklahoma City, June 24.—Seeking a U.S. Civil War pension, Charles N. Gilbert, 101 years old, made his way here from his home in Altus. His case will be considered by state officials.

Prince of Wales' 39th Birthday

(By Associated Press in Calgary Herald)

London, June 23.—The Prince of Wales varied the routine of his busy life but little on Friday in celebration of his 39th birthday. He spent the morning at his Forest Belvedere home, and motored to York House to read hundreds of greetings from all parts of the world.

Then he visited Buckingham Palace to receive the congratulations of Their Majesties.

Thursday evening the Prince witnessed a moving-picture of his own life, the exhibition of which is expected to raise at least two hundred and fifty thousand pounds for charity. The prologue is delivered by the Prince himself, and concerns unemployment.

The picture was gathered in all parts of the world and cut under the Prince's direction from 80,000 to 6,000 feet. Perhaps the most interesting section is that showing his investiture as Prince of Wales at Carnarvon Castle, when he was 17.

Says 1,200,000 Have Returned to Work in U.S.

(By Associated Press in Calgary Herald)

Washington, June 23.—William Green, president of the American Federation of Labor, said Thursday night more than 1,200,000 men had gone back to work in the United States since March.

Hanna Youth Killed in Car Crash

(Special Dispatch in Calgary Herald.)

Hanna, June 24.—Hubert Lindstrom, aged 18, was fatally injured early Saturday morning when the car which he was driving skidded on the highway east of Kichdale, turned over twice and struck the bridge over Berry Creek.

The boy was rushed to the hospital by C. Blaney of Hanna, but died shortly afterward. He is survived by his father, Albert Lindstrom, proprietor of the Universal Garage, his mother, and one brother.

\$400,000,000 for Highway Work in U.S.

(By Associated Press in Calgary Herald.)

Washington, June 24.—President Roosevelt's public works board today officially allocated \$400,000,000 for highway construction to put men back to work and took under advisement \$135,000,000 housing programme requested by the army.

A 30-hour week where feasible and "just and reasonable compensation sufficient to provide a standard of living in decency and comfort" were prescribed by the board.

Police Use Tear Gas on Unemployed

(By Canadian Press in Calgary Herald.)

Who Owns Canada?

The question which appears as the heading of this article was included in examination papers recently submitted to pupils in Montreal schools coming under the jurisdiction of the Catholic School Commission of that city. Answers to the question revealed such vague and uncertain knowledge regarding the status of the Dominion that the Commission appealed to the Secretary of State at Ottawa for an authoritative definition of Canada's status within the British Commonwealth of Nations, and among the world of nations.

The answer, given over the signature of Hon. C. H. Cahan, Secretary of State, defines Canada as a self-governing state of the British Commonwealth of Nations. It sets forth that Great Britain does not own Canada any more than Canada owns Great Britain; that Canada and Great Britain are each independent members of the British Commonwealth, and that the Dominion belongs to the people of the Dominion.

This answer should set at rest a large amount of uncertainty among Canadians regarding the official status of the land of their birth. It was evident from the answers submitted in the school examinations at Montreal that the subject had not been sufficiently emphasized by the teachers, and the secretary of the Catholic School Commission has stated that in future more attention will be paid to it. It would be well if this was done, not only in the Catholic schools of Montreal, but in all schools throughout the Dominion.

Canada is today an absolutely free and independent nation,—just as much as so any other nation in the world. The King of Canada is George V. He is also King of Great Britain, King of Australia, Emperor of India. In Canada the King is represented by the Governor-General, who is appointed by the King on the advice of the Government of Canada. At one time the Governor-General was appointed on the advice of the Government of Great Britain, and he represented that Government, as well as the King, in Canada. But not now,—he represents the Crown only, while the British Government is represented in Canada by a Commissioner in the same manner as the United States, France and Japan are represented by Ministers, and Canada is represented in Great Britain by a Commissioner just as other countries are represented there by Ambassadors and Ministers.

The term and status of "Commissioner" is employed between two Dominions of the British Commonwealth because each have a common sovereign and such a sovereign does not send an Ambassador or Minister to represent him to himself as he does to represent him to other sovereign nations. The Crown being represented in the person of the Governor-General, the King's several governments are represented the one to the other by Commissioners.

The question may be asked: If Canada is an independent, fully self-governing Dominion of the British Commonwealth of Nations, why does it not enjoy the power to amend its own constitution, and why are appeals taken from decisions of the Supreme Court of Canada to the Privy Council in Great Britain? Other nations, it may be urged, have power to amend their own constitutions, and their Supreme Courts are final courts of appeal.

The answer is, that Canada can exercise both these powers whenever the people of Canada desire to do so, and probably the time will come when they will so decide. Up to the present, Canada has preferred to retain to itself the right of carrying judicial appeals to the impartial tribunal of the Privy Council, especially in all matters in dispute between the Federal and Provincial Governments. There is no compulsion that it should do so, and it can refrain from so doing, or can abrogate that right should it deem it wise to do so.

So, too, in regard to amendments to the Canadian constitution. The B.N.A. Act created a confederation of Provinces, reserving to the Dominion certain exclusive powers on the one hand and certain other exclusive powers to the Provinces on the other hand, while in regard to some matters jurisdiction was divided between the two authorities. The Provinces, therefore, have as much right as the Dominion itself to say when and how the constitution shall be amended, and up to the present time certain of the Provinces have preferred to leave the matter as it was at the time of Confederation, with the British Parliament making such amendments to the constitution of Canada as the Parliament of Canada, with the consent of the Provinces, may request. But Canada can secure full and final control over its own constitution if and when the people so desire.

So, the complete and final answer to the question: "Who Owns Canada?" brings us back to the definition given by the Secretary of State at Ottawa.—the Dominion belongs to the people of the Dominion. They are masters of their own national destiny. Nobody can tax them but themselves; they pay tribute to no other nation. Canada can make its own treaties with other nations irrespective of the effect such treaties may have upon other Dominions of the British Commonwealth.

But, because the Dominion belongs solely to the people of the Dominion, the great responsibility rests upon them as citizens of a sovereign nation among the nations, with absolute equality in the League of Nations, to govern themselves, and to so conduct their national and international relationships, as to command the respect of and wield a great influence for good in the world. There should be no spirit of a narrow nationalism in Canada; quite the reverse.

Mayors Are Youthful

The new mayor of Detroit is 31 years old and everyone is commenting on the fact that he is extremely youthful to be assuming such a heavy responsibility. We should like to point out that the mayor of Windsor is but 33 years old and that he is now well into his second term. He was 30 when he took on the job and, furthermore, he had no aldermanic experience. —Border Cities Star.

Of course women are vain creatures who like to be looked at but, my dear, among the Himalayan glaciers, you've noticed who does the most marching in parades.

Railway Man Solicitor

Recently J. F. Pringle, general superintendent of transportation Canadian National Railways, received the following wire from A. MacNab, at Peterborough: "C.N. 403,102, shipped by — for Plessiville, Que., has robin's nest under running-board of car. Arrange for supply of worms at terminals. The mother is in charge."

The hottest place in the world is Ladakh, an isolated province of Kashmir, among the Himalayan glaciers. The day temperature at this season often reaches 160 degrees.

Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it seizes you how it is going to end. Let it run for a day or two and see how weak and painful you will have you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

Chemical Products

Depression Does Not Seem To Affect Demand For Toilet Preparations. It is evident from the study of the recently issued preliminary report on the production of chemicals and allied products in Canada in 1932 that the depression has practically no effect on the demand for toilet preparations. In 1928 the selling value of these preparations at the plants where they were made was \$4,618,291. In 1931 the value of the output had risen to \$5,946,292 and in 1932 it was \$5,073,131.

The demand for medicinal and pharmaceutical preparations continues on the upgrade. In 1928 the combined value of these products made in Canada was \$17,224,351 and in 1932 it was \$18,145,573, the high mark of \$19,038,894 being reached in the memorable year of 1929 when for several months prices of every commodity were at their highest point.

The chemical and allied products industry in Canada is a substantial one. Last year the aggregate production had a value of \$95,540,340. It is divided into 14 groups and there are 628 factories, most of which are in the Provinces of Ontario and Quebec. The 14 groups are as follows: coal tar distillation; acids, alkalies and salts; compressed gases; paints, pigments and varnishes; soaps and washing compounds; medicinal and pharmaceutical preparations; toilet preparations; fertilizers; wood distillation; inks; adhesives; polishes and dressings; flavouring extracts, and miscellaneous chemical industries.

Imports into Canada under the classification of chemicals and allied products were valued in 1932 at \$27,861,580. About 62 per cent. of \$17,275,161 was purchased from United States and 17 per cent. or \$4,719,074 from the British Isles. Exports from Canada increased slightly in 1932, the total value being \$11,035,179 as compared with \$10,848,946 in 1931. United States, United Kingdom, Mexico, Portuguese Africa, Newfoundland, Hawaii, Australia, British India, Netherlands, Cuba and China in the order named were the main purchasers of Canadian chemicals and chemical products.

Membership Shows Decrease

Quakers Are Having Controversy Over Members By Birthright. Membership of the Society of Friends—the Quakers—shows a slight decrease in Great Britain during the last 12 months. There are now 19,119 registered members compared with 19,218 in the peak year of 1916.

The Society of Friends is one of the few religious bodies into which a child is accepted at birth, without either baptism or, at a later date, confirmation or confession of faith. This "birthright membership" recently has been seriously criticized, and it is now possible for Quaker parents to delay the acceptance of membership of their children until the young people are of an age to decide theological matters for themselves.

Last year the society accepted by conviction 219 new members, 47 fewer than in 1931, while 130 individuals either resigned or were disowned or disassociated. There were registered 89 "birthright" members and 50 minors; but 318 Friends were lost to the society by death.

More Freight Moving

Transportation Situation Shows Signs Of Improvement.

The transportation situation in Canada is showing considerable improvement and reflects the increasing confidence of the buying public and improving internal and external commerce, said a bulletin issued by the Department of Trade and Commerce. Carloadings for the week ending June 10 numbered 40,812 cars, an increase of nearly 2,000 cars over the preceding week and representing the largest movement of freight in 34 weeks.

"Movement of merchandise freight, representing as it does the shipments from manufacturers to wholesalers and wholesalers to retailers showed a marked improvement," said the bulletin. "Movement of merchandise by railroad has climbed up to nearly three-quarters of normal while that via canal boats in May was approximately double that of the corresponding month last year. Iron ore passing through the Sault Ste. Marie Canal was heavier by over 6,000 per cent. and bituminous coal was practically double that of May, 1932.

There is a saying that heaven will protect the poor working girl. "But who will protect the guy she is working?" asks a college wise-cracker.

HAD RHEUMATISM FOR 20 YEARS

But None Since 1930

This man must have something like a record for suffering. He says: "Since 1910 up to 1930—that is 20 years—I have been a great sufferer with rheumatism. I am pleased to say that since 1930 up to date, I have been free from that dreadful pain, simply by taking Kruschen Salts—and nothing else. I must say that 20 years is a long time to have that awful rheumatic pain about one."—W. P.

Your rheumatism is just like his and everyone else's. It is caused by sharp-edged uric acid crystals getting into your joints. Kruschen will dissolve these crystals away. Furthermore—if you keep up the "little daily dose" ever afterwards, it will never be possible for them to form again. Rheumatism will be gone for good.

Joy-Riding By Air

New York People Have Money For Extravagant Notions.

Late one night the staff of St. Hubert Airport, near Montreal, had word that an airplane was coming in, and they turned on the beacons and lights.

At 12:30 midnight the plane arrived from Roosevelt Field, New York. There alighted two men and a woman, in evening clothes. A taxicab was in waiting, and it hurried them away to Montreal.

Just before four o'clock the party returned, boarded the plane, and were back in New York for an early breakfast.

Thus between sunset and morning these people travelled to Montreal, had three hours in that city, flew home in time for work. The cost of the outing was about \$500. If the incident has a moral perhaps it is that New York still has money for extravagant notions—and that the new beer has not destroyed the strong attraction of Montreal for its wealthy neighbors.—Ottawa Journal.

Use Of Anti-Toxin

New Treatment Of Diseases Of Children Is Reported.

New developments in treatment of two diseases of children, scarlet fever and whooping cough, were reported to the American Medical Association.

There is hope that it will be possible to immunize infants against whooping cough just as they are protected from diphtheria, by treating them with a vaccine, said Dr. Louis W. Sauer, of Evanston, Ill.

Tests showed, he said, that not one of the children he vaccinated contracted the disease.

Use of anti-toxin in cases of scarlet fever has been definitely shown to reduce severity of the disease and its dreaded complications. Dr. Luke W. Hunt, of McCormick Institute for Infectious Diseases, Chicago, reported, summarizing study of more than 2,000 cases.

The anti-toxin should be given within the first day or two after the patient becomes ill with scarlet fever, he said.

Smashing the Atom

Powerful Hammer Devised By Scientists Accomplishes Feat.

The most powerful hammer yet devised for smashing the centres, or cores, of atoms, which are believed to hold the secret of how all matter is built, was described before the American Association for the Advancement of Science.

This atom-smashing hammer is the deuterium, the infinitely small but enormously powerful core of the heavier of the two atoms of hydrogen which is fired like a bullet into the cores of atoms that are to be smashed. Latest results of its use were reported by Drs. Gilbert N. Lewis, M. Stanley Livingston and Ernest O. Lawrence of the University of California.

Removed Half Of Brain

Removal of almost all of the right half of a woman's brain with no noticeable effect on her mentality and only partial paralysis on the left side was reported to the American Medical Association. Twenty months after the operation, Dr. Gardner said, "examination disclosed no change in intellect."

The Irish Free State expects many visitors from America this summer.

Permanent Exhibition Planned For London

Alexandra Palace May Be Turned Into Amusement Place.

There is a prospect of London being endowed with a permanent "Wembley Exhibition." The Alexandra Palace, on the northern heights of London, Eng., which has long been the despair of all concerned with it, has been taken in hand by no fewer than 18 local authorities, who have recommended grants for its modernization which will amount to \$1,000,000. It is proposed the Palace shall be so renovated as to convert it into a first-rate place of exhibition and general amusement. The history of the Alexandra Palace is a dreary one. It was opened exactly 60 years ago as a northern rival of the Crystal Palace, which stands on the southern hills bordering London. A fortnight after its opening it was burned out. Shortly after it had been rebuilt it was compelled to close owing to lack of funds, and remained closed for nine years.

For 20 years following, it had fitful bursts of enterprise. At length money was subscribed to save the park from falling to the speculative house builder. The park, which extends to almost 200 acres, was a valuable acquisition, but nobody ever has been able to do anything effective with the great sprawling palace itself. During the war it made itself useful, first as a harborage for Belgian refugees, and later for German prisoners.

The only good thing in the Palace is the great organ. This was the masterpiece of "Father" Henry Willis. Music-lovers of North London a few years back contrived to find the money to make the organ as good as new, and week-end concerts at the palace have been popular.

Social Progress

Must Keep Pace With Scientific Advance, Says Hon. R. J. Manion.

Social progress must keep pace with scientific advance in order to bring about an equitable distribution of the benefits of progress, Hon. R. J. Manion, Minister of Railways and Canals, told the Canadian Electrical Association at their annual banquet at Lucerne-in-Quebec.

Dr. Manion urged that not only public men but business men and scientists give serious thought to bring about social reforms that would enable a greater number of the people to share the benefits of what they produce.

The minister made electrical development the theme of his address but touched also on the problems of the day and the world economic conference. It was inconceivable, he said, that the conference would fail to achieve its end. If there should be difficulties between the European nations and United States, Canada would be in an excellent position to act as an intermediary. Dr. Manion said, but he did not anticipate any such difficulties would arise.

He expressed the belief that the vast majority of people in Canada were opposed to the export of electrical power, not only because it was a direct loss to industrial possibilities in the Dominion, but because of the great difficulty in shutting off power from a friendly country once communities had been built up in the power exporting area.

Cypress Hills Park

Highest Elevation Of Any Part Of Saskatchewan.

Cypress Hills Park, known as the Highlands of Saskatchewan, will be officially opened this year. This park is 20 miles south of Maple Creek and has the highest elevation of any part of the Province of Saskatchewan. Some of the streams in the park flow south to find the Missouri River and some flow north to join the Saskatchewan River and then on to Hudson Bay. The main park is 4,500 feet above sea level and part of it is even higher than Banff, the famous mountain resort in Alberta. New buildings in the park include one lodge with 18 large rooms and a number of log cabins.

French Radios Licensed

Under the new Finance Law radio owners in France must have a license. Owners of crystals sets are compelled to pay \$1 a year, and owners of valve sets \$3. Sets installed in places where the public may listen are licensed for \$6.25 or \$12.50 if the public pays an admission fee.

Flax was grown on 24,000 acres in England in 1870; nowadays probably the only flax produced is on the King's Sandringham estate.

England's Russian population now totals 67,925.

Ingenuous Excuse For Speeding

Thought Fire Engine Was Coming Said San Francisco Girl.

The excuses proffered by our young women motorists when caught speeding are curiously lame and hackneyed. complains a correspondent of the Manchester Guardian.

Why not emulate a girl friend over in San Francisco, who declared, truth positively radiating from her big blue eyes, that she thought a fire engine was behind her, and that it was up to her to hurry to get out of the way. She was chased by motorcycle policemen, and did not stop until two shots had been fired by them. Why are not our own traffic police encouraged by "the Yard" to tackle their job in this modern and virile way? At least a machine-gun might be stationed at busy spots along bypass roads during summer weekends to increase respect for the law, even if it were to fire only blank.

Tax-Free Bond Ruling

Tax-free Victory bonds forfeit that exemption when they are paid out by a company to its shareholders in the form of dividends. This was the judgment of the supreme court of Canada. Mr. Justice Lamont dissenting, on an appeal taken before it by D. J. Watrous of Brantford. The judgment dismissed the appeal with costs.

A historian announces that women used cosmetics in the Middle Ages. Women still use cosmetics in the middle ages.

More than 10,000 Alberta silver fox furs were placed on sale at the first annual sale of pelts in London this year.

W. N. U. 2000

Sees World Wheat Surplus And Believes Curtailment Of Production Is Only Solution

In the April issue of Canadian Business, writing under the pen-name of John Marquis, an authority on the wheat situation had an article in which, after analysing the situation as he saw it, he reached the conclusion that no real evidence exists of a world surplus of wheat. In the current issue of this organ of the Canadian Chamber of Commerce, John I. McFarland, general manager of the Canadian Co-Operative Producers Limited, makes a spirited reply, in which he questions the basis of this conclusion, puts forth figures to indicate that there is a surplus and argues the need of acreage reduction.

Mr. McFarland states that statistics show that the visible supplies of wheat had commenced to accumulate before the unusually good crop of 1928 and since its disposal they have continued to accumulate. He quotes the International Institute at Rome to the effect that wheat stocks will experience a further appreciable increase during the present season, that exportable stocks will have risen from 565 millions on August 1 last year, to 650 millions by next August. Total international trade for this year, he states, is estimated to be somewhere between 630 and 664 million bushels, so that the exportable carryover surplus really represents 100 per cent. of the total international trade for a year. The surplus, he asserts, "becomes a quantity of paramount importance as a price making factor." Based on the present world's wheat and with average crops, he states, the world's surplus will continue to increase.

As regards the position of Canada, Mr. McFarland sets forth that before the war this country supplied about 13 per cent. of the world's international trade in wheat. Since then Canada has increased her acreage greatly. If this country continues its recent acreage and reaps average yields per acre, it will appear necessary, says this authority, that Canada must secure very close to 50 per cent. of the world's trade to dispose of its crops. Does anyone believe, he inquires, that other countries are going to leave to Canada the privilege of supplying this proportion?

What is the solution for the conditions described? According to Mr. McFarland, the only method by which there may be any permanent advance in prices is by a world-wide reduction in acreage. In such a movement, he thinks, Canada should be a leader because in the past twenty years she has increased her acreage by a much greater percentage than any other exporting country. He goes on:

"The Laws of Nature of the Acts of Providence might conceivably reduce production on this over-extended acreage, but such reduction can cause after all those Laws, over a period of years, will make their averages. Therefore, it appears that there is only one way of permanently correcting the unsound conditions and that is by the actual reduction in acreage."

Mr. McFarland buttresses his contention with the statement that the United States has fed an unusually large quantity of wheat to animals during the last three years—a quantity sufficient for a year's world supply. He points to this as an answer to the people who say there is no over-production and that the problem is only one of underconsumption.

The viewpoint thus set out is the viewpoint of a large element in the West which favors agreement for curtailment of production and control of distribution.

Rail-Bus Is Speedy

The "rail-bus," a new type of vehicle with a 100-horsepower steam engine, has just been placed on the Brighton-Devlin Doyle line of the Southern Railway of England. It will accommodate 44 passengers, and in test runs has speeded over 60 miles an hour.

The distance from the earth to the most distant known nebula is 900,000,000,000,000 miles or about 140,000,000 light years. This is the greatest length ever actually measured.

"What is the best thing to do when suddenly faced by an infuriated bull?" asks a correspondent about fifteen miles an hour.

W. N. U. 2000

Canadian Mosquitoes

About Sixty Species Of This Pest Found In Canada

There are about sixty species of mosquitoes in Canada, many of which feed on the blood of man. Although the majority of them, particularly the kind known as Aedes are most troublesome in field and woodland, in certain seasons, as at present, as the result mainly of non-control, they often cause considerable annoyance indoors as well. Their attacks are most noticeable at dusk, and in warm, dull, humid weather. In autumn and winter, also, complaints are frequently received of the presence of numbers of mosquitoes in cellars and basements. These mosquitoes are the hibernating females of the genera Culex and Anopheles which pass the winter as winged adults in protected situations. Attacks from them are rare. However, in many parts of Eastern Canada, the cosmopolitan house mosquito, known scientifically as Culex pipiens, is now well established, especially in towns and cities, and in one large city has become a public nuisance. This species is found not far from dwellings which it enters freely, biting particularly at night. How householders and others can combat the mosquito nuisance is fully explained in "Mosquito Control in Canada," a pamphlet issued on request by the Dominion Department of Agriculture.

World's Largest Zinc Mine

Sullivan Mine At Kimberley, B.C. Is The Largest Producer

The Sullivan mine at Kimberley, British Columbia, is the world's largest producer of zinc ore and one of the leading producers of the ore of lead and silver. This mine has produced a grand total of 1,596,153 tons of lead, 1,261,473 tons of zinc, and 55,184,466 ounces of silver since it began to operate in 1900, up to the end of 1932. Last year 1,441,045 tons of lead-zinc-silver ore were milled, as compared with 1,614,740 tons in 1931. The Sullivan is the source of nearly all the annual lead output for Canada, and of over 80 per cent. of the zinc production. Since 1925 it has held supremacy in the production of silver.

Fort Steele mining division, in which the Sullivan mine is located, has several other silver-lead and silver-lead-zinc properties, which in past years have made important contributions to the output. Many years ago this district was an important producer of placer gold, and interest in the placer prospects are again active, due to the present premium on gold. There are also in the Fort Steele area a variety of non-metallic minerals, such as gypsum and crystalline rock magnesite.

No More Constantinople

City Now Called Istanbul and Is Not Turkish Capital

The first two things to remember about Constantinople nowadays is that it is not the capital of Turkey and that it is not called Constantinople. The capital is Ankara where the President-dictator, Mustafa Kemal, lives on his estate "Pinecliff," and Constantinople is called Istanbul. It is a city with a million inhabitants and about fifty thousand starving dogs, but some time ago they were taken out to a deserted island with no food or water, so that they all ate each other until the survivor died of thirst.

One Great Advantage

School days being once more over there will be many boys and girls with nothing to do and no place to go. Here is where the farm has advantages over city life. The farm boy or girl can be given some responsibility or some task that will be useful to them and not disadvantageous or costly to the parents. Farm youth do not have to spend their vacation days in idleness. Farmer's Advocate.

Used Discretion

When a herd of 36 elephants paid no attention to the furious blowing of a locomotive whistle as they leisurely crossed a railway track between Bulawayo and Gwelo, Africa, the engineer had to stop his train until they were out of the way.

To utilize surplus sugar, Czechoslovakia is converting it, mixed with bran and other ingredients, into fodder for horses, cattle and pigs.

GOOD LOOKING HOME WEAR HELPS IMMENSELY—MAKES KITCHEN CHORES EASY

Every woman knows she can't have too many home ensembles that will tub and tub and always come up smiling.

And today's model is just lovely. The dress is suitable for the house, garden, porch, marketing, etc. And incidentally, it's decidedly slimming to the heavier build. The diagonal hip seaming reduces bulk. The dress is dark blue and white dimity. The apron is white dimity which is used for the dress trim. And isn't the one-piece apron attractive? And it won't slip off the shoulders either, for the suspender straps are useful besides being modish. Design No. 910 includes the dress and the apron in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Size 16 requires 3 1/2 yards of 38-inch material for dress with 1 1/2 yards of 35-inch material for apron and dress collar. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

AFTER THE RECORD HOP FROM SPAIN

Showing little effects of the strain of their hazardous flight, Captain Mariano Barberan (left) and Lieut. Joaquin Collar, Spanish Army flier, are shown at Camaguey, Cuba, on the completion of their record flight from Seville, Spain, in the "plane Cuatro Vientos" (top). Their route took them over 4,600 miles of ocean.

Distinguished Canadian Artist

Wild Flowers Lived Under Brush Of Late Robert Holmes

Three years ago Robert Holmes, artist, died. Alice Wetherell writes of the painter of wild flowers in The Challenger: "One day in 1899 a young milliner of the Kewartha Lakes district, gave a trimming bonnets with artificial flowers, and settled down to housekeeping with her young husband in Cannington, Ontario. She planted seeds and bulbs and her garden became the best in the village. Not much wonder that wee Robert imbibed love of beauty. It was therefore not so strange that when he drew pictures for the first number of the Art Student's league calendar, he should choose as his subject the back doorway to that house, his mother inside washing dishes, and outside directly in her line of vision, the grapevine, the lilies and poppies massed against the walls.

"Not even remarkable that the lad, brought up with such a background, should finally become Canada's most distinguished painter of flowers, and the greatest painter in America of wild flowers in their native setting.

"The freeweed, loose stripe orchid and Indian pipe, in Holmes' water colors, are never stiff posies, but always seem to be growing in the woodland haunts where he found them. He alone seemed to have the power to put this subtle sense of life into what are usually regarded as 'still-life' pictures. Yet it took weeks of work to picture that spirit which made you smell the perfume and feel the breeze as he did.

"He was a student of the Toronto Art Society and of the Royal College of art in London. He chose Canadian wood flowers for his designing classes as a peculiarly native Canadian motif on which to base their work. With the words 'flowers on his lips' he died, and according to his wish, he was buried in a little hut beside the woods where he so often wandered as a boy."

Want African Colony

Germany Seeks Room For Expansion And Means To Pay Debts
Germany is asking the world for an African colonial empire.

A memorandum prepared by Dr. Alfred Hugenberg, German minister of economies, for the economic committee of the world conference, said there were two possible ways of increasing Germany's capacity to meet her international debts—first, by giving her an African empire where large public works schemes could be carried through; or, second, by opening other new territories "to this people which has not enough space in which to live."

Money From Trees

Australia, strange as it may seem is teaching its young people that money grows on trees. Under adult guidance, state school children of Victoria have set out 4,000 acres of saplings that will be worth \$3,000, 000 on maturity. Profits from the sale of bark and timber will be used to provide scholarships, libraries, radio and sports materials—Christian Science Monitor.

Present Year Marks The Diamond Jubilee Of The Royal Canadian Mounted Police

Price Of High Living

Famed Embassy Club Cat Killed By Rich Food

Jackson the "High Life" cat, the most famous cat in Mayfair, and perhaps in the world, is dead.

Felix, the phantom of the movies, could not hold a candle to Jackson. He was an aristocrat. Kings paid court to him, but he seldom deigned to notice them.

Jackson was the mascot of the famed Embassy Club in London's Bond Street. He figured in novels, caricatures and innumerable gossip columns.

Now like other martyrs to the cause of High Life, he died of acute indigestion at the comparatively early age of eight.

It is impossible to estimate how much smoked salmon, fole gras, leg of chicken and caviare he ate in the eight years he associated with the elite who passed through the portals of the Embassy Club.

Guest after distinguished guest tried to pay court to him with tidbits. Often he turned disdainfully away, but not often enough. It got him in the end.

Lambent green eyes, arched back, tail stiff as a ramrod, Jackson walked aloof. In a sudden fancy he would sit on the knee of a millionaire or the lap of a film star, and then no one would move him. Sometimes he would jump through a human hoop formed by a waiter's arms, his only parlor trick, but only on rare occasions.

Jackson Junior, a small black kitten, now reigns in his stead. At his first appearance, he tasted caviare, blue trout and quail, and he found them all good, far too good for any kitten which hopes to live past the age of eight. If only his absent parent could warn him of the penalties of rich living!—Jackson the "High Life."

Coral Not a Rock

Every Inch Is Built By Tiny Sea Animal

Coral is not a rock, it is made of skeletons. It is really an animal something like a sea-anemone jelly-like and soft, and of olive brown color. It has many tentacles round its mouth, and when it is caught its food it sucks it through its body on a stream of water, which it is continually sucking in. This sea-water contains lime and somehow the coral animal draws the lime from the water and uses it to build a tiny platform for it to rest on. Gradually it makes a home for itself out of lime, and in that it lives till it dies. Then the next coral animal comes along and builds its lime shell on top of the old one, and so on. After thousands of years billions of these creatures will have made a huge mass of lime, which come above the surface of the sea and make a coral island. The Great Barrier Reef, off Australia, is hundreds of miles long, yet every inch of it was made by these tiny creatures.

Leaves Nothing To Chance

Electricity Keeps Tab On Crowds At Chicago Fair

Electricity keeps Century of Progress officials at Chicago informed as to just what the number of persons inside the grounds is at any time. Turnstiles at the various entrances are equipped with counting and recording devices with a central dial in the comptroller's office. A glance at the dials tells how many persons have entered the grounds, how many left and what entrances and exits were used. The information is used in distribution of guards and change at entrances; to notify transportation companies when there is a rush from the grounds and at what exits, and to keep concessionaries informed of the size of the crowds so they will not run out of supplies.

Needs a Pension

Hadji Bey, a Turk, has 43 children—38 boys and five girls. This is believed to be a world record. The Sultans used to give Hadji a yearly bounty, but this has been stopped. Hadji has now applied to Mustapha Kemal Pasha for a pension.

British railway passenger cars have sufficient seats to accommodate more than one-twentieth of the population.

A pedestrian is defined by an exchange as a married man who has a car and a couple of sons.

This year is the diamond jubilee of the Royal Canadian Mounted Police, formerly the Royal North West Mounted Police. This famous force was established in 1873, following the acquisition of the western prairies in 1870 by the Dominion of Canada. The several Indian tribes at that time were powerful and prosperous, but were being demoralized by liquor sellers and by tribal warfare of a nature to discourage settlement by white persons. The Force, only 300 strong at the outset, marched in 1874 right across the prairies from the Red River in Manitoba to the Rocky Mountains, the entire march being more than 2,000 miles and through country which in part was then unknown. The Indians were so impressed that a series of treaties were concluded, and the Government was enabled to assume effective control of the Indians.

In addition to discharging police duties and undertaking much executive work, such as guarding against prairie fires in the early days, visiting lonely settlers, and discharging many other responsibilities, the Force had a share of military duties. The original march across the prairies was a military task, performed in a military manner. During the Rebellion in Western Canada in 1885 the Force bore an active part; a number of officers and men were sent to the South African War; two squadrons for service in France and Belgium and one in Siberia during the Great War were furnished.

The force of 2,500 officers and men of the Royal Canadian Mounted Police is now distributed in the way best suited to perform its many duties. It is found along the International Boundary, where it aids in protecting the revenue and preventing the entrance into Canada of undesirable. It is located on or in the vicinity of Indian Reserves to maintain good order, and to aid in the enforcement of laws. It occupies many lonely posts in the North West Territories and the Yukon, and along the Arctic and Hudson Bay Coasts. It is found in centres of population and at any point where there is an indication of trouble arising likely to affect the peace and well-being of the country. These officers and men in their uniforms of scarlet stand for constitutional order and government. For 60 years they have been the guardians of the law and administrators of justice throughout the Dominion of Canada.

Historical Garden Roses

Origin Of Beautiful Hybrid Perpetual Roses In Canada

At the end of the eighteenth century the China rose with its habit of continuous bloom was brought to Europe, says the Dominion Horticulturist, Dr. Macoun, in discussing the probable origin of the beautiful hybrid perpetual roses in Canada. Before very long hybrids of the China rose with French and Provence roses were raised. They were called Hybrid Chinese, but took after their European parents in that they flowered only once in the season. These hybrids and the damask roses were then crossed, and Rose du Roi, a damask perpetual, was introduced about 1819. This rose was called perpetual because it had a second blooming season. Six years later Gloire de Rosames appeared, followed by rapid improvement of this class, and in the fifties such garden favorites as General Jacquemont and Jules Margottin were introduced. In Canada many of the hybrid perpetuals bloom once only in the season.

Wrapper And All

The general practice to wrap things, in cellophane has its disadvantages. Take the case of the startled man who ordered a ham sandwich at a lunch counter for example:

"Was that sandwich quite fresh that you sold me?" he asked. "Quite, sir," replied the lunch counter attendant. "Each one is wrapped in transparent, 'airtight' paper."

"Gosh!" said the customer. "I wish I'd known that."

Bit Of A Puzzle

"I'm glad you're so impressed, dear, by these explanations I've been making about 'hooking and crooking,'" remarked the young husband. "Yes, darling, it seems wonderful that anybody could know as much as you do about money without having any of it."

WORLD HAPPENINGS
BRIEFLY TOLD

The 50,000 employees of the General Electric Company in its plants in various parts of the United States will receive a five per cent. increase in wages effective July 1.

After serving as organist of Christ Church, Highbury, for 53 years, and breaking all records for length of service as organist in England, Miss M. Cooper, aged 83, has retired.

Ko Tahil has been appointed Japanese consul for western Canada with headquarters in Vancouver and will arrive this month. He succeeds T. Hachiya, who returned to Tokyo, Japan, seven months ago.

Clara Zetkin, noted German Feminist and Communist, died unexpectedly at a sanatorium at Archangelskoye, near Moscow. In another month she would have been 76 years old.

Services of an internationally known detective agency will be used by the Toronto library board to recover books loaned and not returned. The agency will receive 25 cents for every book it retrieves.

The British Government has announced that the King has approved the appointment of Lieut.-Col. P. R. Laurie to be assistant commissioner of the Metropolitan Police, succeeding Major Maurice Tomlin, who has been retired on pension.

Princess and Florence Collieres of the Nova Scotia Steel and Coal Company were holding coal for the first time since the miners refused two months ago to work under wage reductions. They accepted a compromise wage scale.

Vancouver offices of the United States Department of Commerce have been closed. Greatly reduced appropriations for the commerce department are responsible. The only commerce office now left open is in Ottawa.

Agricultural department officials foresee a re-opening of the market for Canadian cattle in New York state, practically closed since Oct. 1, 1932, when an order went into effect requiring cattle imported into that state be certified free from Bang's disease.

The death of Senator Paradis brings the list of senatorial vacancies to nine, the largest number of unfilled seats in the red chamber for some considerable time; Saskatchewan, Ontario, New Brunswick and Quebec are each short two senators, while Nova Scotia has one appointment to be made.

Adventure In North

Boys From Honolulu On Scientific Quest In Alaska

Ten boys from Honolulu, ranging in ages from 14 years to 17 years have sailed from Vancouver for a summer of scientific research and adventure in northern Canada and Alaska.

They will proceed to Skagway and go into Whitehorse where they will build boats for a run down the Yukon River to Dawson, Fort Yukon and Tanana. They will rough it until August, cruising an estimated total of 1,600 miles. They will collect botanical specimens for the University of California and do some prospecting.

Bayne Beauchamp is in charge of the expedition.

Auto Production

May Production in United States Highest In 22 Months

May production of motor vehicles by member companies of the United States Automobile Chamber of Commerce was the highest in 22 months, according to a preliminary report.

Output totalled 172,883 units, a gain of 28 per cent over April and of 51 per cent over May, 1932. Production for the first five months of this year, on the basis of this estimate, amounted to 605,739 units as against 584,505 in the same 1932 period.

The organization includes all major producers except the Ford Company.

For Canadian Cattle Trade

At the request of the Department of Trade and Commerce the Dominion Steamship line has specially equipped the steamer "Nevisian" for the cattle trade. The vessel, first of her line to engage in the Canadian trade for over eight years, sailed from Montreal with 536 head of Canadian cattle for Cardiff together with 150,000 bushels of Canadian grain and a general cargo.

Many of London's 32,000 factories are resuming operations.

W. N. U. 2000

A Strange Assignment

Dr. O'Neill Returns From Africa Where He Exhibits For the Chicago Fair

Returning from what is perhaps one of the strangest assignments ever given to a man, Dr. Owen R. O'Neill, of Chicago, arrived in Montreal on the Cunard liner "Aurania." Dr. O'Neill has just returned on behalf of the Chicago World Fair Authorities and has just completed a tour of Africa from Abyssinia to the Cape of Good Hope, where he visited various tribesmen throughout the Dark Continent.

He has also collected a large number of exhibits of their primitive art and workmanship. After some months of ceaseless travel in Africa, Dr. O'Neill has at last collected as interesting an assortment of natives and their characteristic work as his probably ever been got together for exhibition purposes. The collection of twenty-two natives together with the exhibition material are coming on the Cunard liner "Aurania." The natives are travelling in special third class accommodation and are expected to arrive in their native dress when they will probably create something of a furore.

Dr. O'Neill is a medical practitioner, but in view of his previous experience as an explorer in Africa he was engaged by the Chicago World Fair to collect material for the exhibit on Africa. The effort was made somewhat belatedly. Dr. O'Neill explained in an interview on arrival, that he did not have the time to make his collection of individuals complete. He found that the British Government and the Belgian Government whose rule extends over many sections of central Africa where are located the most interesting tribes, refused permission to allow natives to be used for exhibition purposes. There was no such objection, however, from the French Government, and Dr. O'Neill was able to obtain a large variety of specimens of various types in the Cameroons, Portuguese Africa, and other sections in Central Africa.

Dr. O'Neill's original trip was to London, England, hence to Cape Town by steamer, after which he made the Imperial Airways trip direct to Paris with the customary stops at places like Bulawayo and Nairobi, afterwards proceeding from Paris to Addis Ababa, capital of Abyssinia. Every facility was given him to obtain native help, so that he proceeded south through other regions.

The tallest passenger on the "Aurania" was certainly Dr. O'Neill, who is making a rush trip to Canada. Mr. Greene is 8' 8" tall, 180 lbs. high, and is a native of the United States. He is a member of a big family. The berth in his cabin, made for passengers of more modest dimensions, had to be altered to accommodate the Herculean figure. Mr. Greene comes of a famous family of tall men and claims he can trace his ancestry back two or three centuries. Although born in Brazil, he served in the British Diplomatic Service in Russia, and is now the owner of a garage in England.

Recipes For This Week

(By Betty Barclay)

HUNGARIAN CHOCOLATE

(Using egg yolks)

2 squares unsweetened chocolate, cut in pieces.

1 1/2 tablespoons hot water.

1/2 cup confectioners' sugar.

2 egg yolks, well beaten.

1/2 cup butter, well beaten.

1/2 cup water to remove salt.

Melt chocolate in double boiler, add hot water, and blend. Add sugar and egg yolks, and beat well. Remove from fire and allow mixture to stand over hot water 3 minutes or until slightly thickened, stirring constantly. Cook quickly to lukewarm.

Add butter, a tablespoon at a time, blending after each addition. Makes enough frosting to cover top and sides of 8 x 8 x 2-inch cake, or tops of two 9-inch loaves.

Note: This is a small recipe. Double the recipe for enough frosting to spread between layers and on top and sides of three 9-inch loaves.

HAM LOAF

6 hard boiled eggs.

2 cups cooked ham, chopped fine.

1 cup milk.

1 tablespoon flour.

1 tablespoon butter.

1 teaspoon Worcestershire sauce.

1 teaspoon salt.

1 teaspoon mixed mustard.

Salt and pepper.

Make a white sauce of the flour, butter and milk. Add seasonings. Arrange a layer of the sliced, hard boiled eggs in the bottom of a baking pan. Pour on a little of the sauce.

Add a layer of the ham. Cover with sauce. Continue alternating layers until all is used. Cover top with well buttered bread crumbs. Bake thirty minutes in a moderate oven.

A girl can always tell when a man is in love with her by the way he looks at her when she isn't looking.

Egypt now considers that its onion crop is its second most profitable product, cotton being the first.

By Ruth Rogers

A QUAINET PRETTY FROCK IS THIS WITH ITS BOWS—PUFFED SLEEVES

Isn't it attractive? The raglan shoulders and puffed sleeves are so youthfully smart. And the plaited arrangement at the front is most attractive with its long lines. Carrot-red crinkly crepe silk is as smart as can be as the original. A crepe silk print in blue and white is fetching with white crepe used for the sleeves and bow worn with a white leather belt. Style No. 316 is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 2 1/2 yards of 39-inch material. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Every year British milk suppliers need 65,000,000 new milk bottles to replace losses due to breakage and theft.

Uniquely At Chicago World's Fair Arranged By Firestone Factory

One of the most unique attractions at the World's Fair at Chicago is the Firestone Singing Color Fountain, in the gardens surrounding the Firestone factory and exhibition building.

This gorgeous spectacle is the only one of its kind in the world. It presents in marvelous beauty a perfect harmony of music, ever-changing color combinations and variations in the rise and fall of the beautiful mystic fountain. This scientific engineering achievement is the result of years of work by some of the world's greatest electrical engineers and scientists.

This magnificent Singing Color Fountain is situated in front of the ultra-modern and attractive Firestone factory and exhibition building in the center of the spacious garden, surrounded by trees, shrubs and

beautiful flowers. The great pool is 100 feet long and 15 feet wide, out of which rise the many dome-shaped mystic fountains, the powerful light rays of varying hues penetrating the misty water. This diamond-like spray shoots twenty feet in the air—all in tune with the music. The ever-changing shots of colors and the varying volume of the water are in complete tune with the music that fills the air from immense radio loud speakers hidden within the walls of the building.

The Firestone factory and exhibition building is one of the main attractions of the World's Fair. The building contains a complete tire factory, showing every step in the manufacture of tires, and many unique and interesting dynamic displays of an educational nature.

In addition to this, Firestone has an exhibit in the great "Hall of Science" where one of the features will be a group of rubber trees from the million acre Firestone Rubber plantations in Liberia.

Trail Blazers

Bank Of Montreal Opens Branch At Port Of Churchill

"Standing on Franklin's trail of 1819, and looking out over Hudson Bay, where the great explorer of that name died, we ask all our friends to raise their glasses and toast with us, the hardy trail blazers who first visioned Churchill harbor as a world port, and all those who followed to boost for the Hudson Bay Railway.

This was the tribute made by four present-day trail blazers of pioneering spirits, who made a pilgrimage to historic Churchill, and who see in the far north a new land of great wealth and opportunity for Canadians and for the world.

They were John Calhagan, general manager of the Northern Alberta Railways; W. A. Brown, retired general superintendent of the Canadian National Railways, now of Edmonton, and who in 1880 was conductor of Canadian Pacific Railway, operating into Winnipeg; John Blue, author of "History of Alberta" and other works, and at present secretary and manager of the board of trade, and chamber of commerce, Edmonton; Frank Pike, manager of the Bank of Montreal, Edmonton.

Among those who travelled the northbound "Muskeg" train of the summer schedule were Major J. G. MacLachlan, district engineer of the Hudson Bay Railway; and T. W. Tod, who will be manager of the Bank of Montreal at Churchill this summer. He was accompanied by H. L. McKay, who will work with him. The party were present at the official opening of the bank on June 10th.

Shingle Industry Revives

All Big Plants In Fraser River Valley Working Full Time

The shingle industry on the Fraser River is booming with virtually all the big plants working double shifts, and employing approximately 1,000 men in the New Westminster district. Some plants have orders sufficient to keep them busy most of the summer. Prices have advanced sharply.

Shingle production in the lower Fraser Valley this year is expected to reach 1,200,000,000 pieces of value of \$2,000,000 against 770,000,000 pieces in 1932. Increased shingle production means more activity in the woods.

An Amazing Machine

An amazing machine was demonstrated in Aberdeen, for filleting fish of any size. During the demonstration the machine took charge of a batch of small haddock, chopped off their heads, stripped off their fins, cleaned them, shaped them, and removed their bones without crushing or damaging them. It delivered them ready for smoking or packing at the rate of thirty fish per minute.

SUNDAY SCHOOL LESSON
JULY 2

SOME EARLY LEADERS OF ISRAEL—JOSHUA

Golden Text: "Be strong and of good courage; . . . for Jehovah thy God is with thee whithersoever thou goest."—Joshua 1:9.

Lesson: Joshua, Chapters 1-6, 23, 24.

Devotional Reading: Psalm 119: 1-8.

Explanations and Comments

The Charge To Joshua, 1:1, 2.—Joshua had been the attendant of Moses. We hear about him in Ex. 17: 8-16; 18:9; 24:13; 22:17; 33:11; Numbers 11:28; 13:16; 14:6-9; 27:18; 31:7, 8; 34:11; Deuteronomy 1:38; 3:28; 34:9. As he was one of the spies sent into Canaan from Kadesh some thirty-eight years before this, he must have been at least sixty years old when Moses died. He was a trained military leader, and the right man to lead the Israelites in their conquest of Canaan. When Moses was about to lay down his command he had anointed Joshua as his successor.

"Moses, my servant, is dead; now therefore arise, go over this Jordan, thou and all this people, into the land which I do give to them, even to the children of Israel"; thus Joshua heard the voice of God in his soul. It was a time, not for grief, but for action. The marble tablet in Westminster Abbey which bears the portraits of John and Charles Wesley has these words inscribed: "God buries the workers, but carries on the work."

He best honors his dead who arises and takes up his task with resolute heart, strong in the faith that God will not forsake him. "What we do in our bereavement is very momentous," declared Dr. J. H. Jowett. "We can sit down and mope in ever deepening melancholy, or we can take up our appointed work, I like that great, deep, loyal word of Ezekiel: 'At even my wife died; and I did in the morning as I was commanded.'"

The Help Promised, 1:5, 6, 8. There shall not any man be able to stand before thee all the days of thy life; for with thee I will be, and thou shalt not be forsaken. These words must have come to Joshua in answer to his prayer for help in the great task before him; he was given faith to believe that the divine help on which Moses had relied would not fail him. Be strong and of good courage. So Moses had exhorted Joshua, Deuteronomy, 31:6, 7, and the reiteration of the words in this chapter has given rise to the supposition that in the beginning Joshua's heart failed him. He was a brave soldier, but he needed more than natural courage for the task confronting him. Had not Moses, the greater leader, said, "Who am I, that I should bring forth the children of Israel out of Egypt?" Hence the Jewish legend that as Joshua was bewailing his insufficiency for the magnitude of his task, and was weeping his clothes and weeping, Moses comforted him with the assurance that God had foreseen and provided for everything. "Be strong and of good courage," are the assuring words he now receives; "for thou shalt be strong and of good courage, as I have sworn unto the fathers to give them."

"The law of his God is in his heart; None of his steps shall slide."—Psalm 37:31.

Machine Hands Out Dole

Officials Trying Device At London Labor Exchange

A machine which automatically pays out unemployment relief and insurance money is being used experimentally at two London labor exchanges, East Ham and Holloway. Instead of the exchange officials having to count out the money to each man, a button is pressed and the correct amount tumbles into a receptacle, and the man in the queue takes it himself.

A ministry of labor official said: "The machine is still in a very experimental state. We are waiting a few weeks to see how well it works before deciding if we will extend its use to other exchanges."

On the Alert

A recent report about high-jackers stealing coffins from an undertaking establishment reminds us of the story about the new night watchman in the big industrial plant who was asked by the foreman if everything was all right.

"Yep!" said the watchman. "I ain't done so bad for the first night. I've checked everything and there's only one thing missing."

"What's that?" asked the foreman. "A steam roller," replied the watchman.

Necessary Devices

Under-sea stairways, mammoth "grabs," soup tubes, sand-sucking pumps, fire hose, incandescent marine lanterns, telephones, and "seven-league" boots which enable men to walk on the sea floor are some of the devices used in salvaging of ships from the sea.

A startling marked in July, 1931, on Mellum, a North Sea island off Germany, has just been found in Ireland.

Millions Of
U. S. Tourists

Over Thirty-Two Millions Crossed International Boundary In 1932

A total of 32,883,619 persons crossed the international boundary between Canada and the United States in 1932, of whom 23,165,782 travelled by bridge, ferry and tunnel; 7,532,000 were motorists crossing on highways and 2,185,837 were railway passengers. The horse-drawn vehicle has practically passed out of the picture, as far as international traffic is concerned, for last year only 64 were reported as crossing from Canada to the United States and vice versa.

Included in the total of 32,883,619 persons who crossed the international boundary were 14,000,000 tourists from the United States who visited Canada for periods ranging from one day to six months.

The heaviest traffic between the two countries is between Windsor, Ontario, and Detroit, Michigan, and Walkerville, Ontario, and Detroit, where two ferries are operated across the Detroit River in addition to one bridge and a tunnel for pedestrians and vehicles; a railway tunnel and three systems of railway ferries also cross at this point. Traffic is also heavy at all times of the year across the Peace Bridge over the Niagara River at Fort Erie, Ontario, and at Niagara Falls and Queenston, Ont.

The boundary between Canada and the United States extends over 5,000 miles of which 3,100 miles are land boundary and 2,400 miles are water boundary.

British Post Office
Receives Odd Requests

People Write About All Sorts Of Queer Things

All sorts of people write to the British post office on all sorts of topics.

One woman asked for a new savings bank book because her old one had been taken from her pocket—and eaten by an elephant.

A native of India sought some information, and ended his letter with: "I bless God make you a king and emperor."

Then a messenger-boy who had left after three years' service with a "reference," wrote complaining that, while he knew he was unpunctual, he had "caused trouble," the postmaster had not filled in the dotted line next to the word "character."

One depositor was officially written to because his signature had changed. He replied that it was "10 long, weary years since I signed the original. The files now slide over the space where once waved my golden tresses."

"My pearly teeth have also departed long since."

"You will agree with Shakespeare 'Change and decay in all around I see.'"

Deaf Children Hear

Microphone That Makes Use Of Light and Sound Waves

A classroom in the School for the Deaf at Saskatoon is fitted with equipment enabling children to hear the voice of their teacher, and even their own voices, previously inaudible to them. It is a microphone hook-up, making use of light and sound waves, designed by Sigurd Sanda, of Saskatoon, who says there is an enormous field for research in this direction.

The microphone is fitted with an amplifier and pupils wear headphones.

Trick Spelling Test

No one seems to know who started this latest fad, but "Spelling Tests" are becoming a popular pastime. Four errors were made by a Toronto member of one of the learned professions when asked to spell the words in the following sentence: "A harnessed pedlar met an embarrassed saddler near a cemetery, to measure the symmetry of a lady's ankle." Of a dozen or more others "tested," only one was 10 per cent correct.

A Venerable Corp

A venerable carp named Polo, living in the largest pool at the Palace of Fontainebleau, near Paris, is dead. He was well known to visitors to the park. He was recognizable by a large gold ring which had been put through its nose. The guides state that this ring bore the inscription, "Napoleon, Emperor," and that this carp was placed in the pond in 1814, shortly before Napoleon was exiled to Elba.

Foreign trade of the Soviet Republic in the first three months of this year was 57 per cent. less than in the same period of 1932.

FRANCO-U. S. TROUBLE WAS SOON ADJUSTED

London, Eng.—The secret meeting at which Franco-American difficulties were adjusted provided the most dramatic incident since the inception of the world economic conference. The meeting was held in a private room in a secluded part of conference headquarters.

Prime Minister Ramsay MacDonald, president of the conference, knew the full import of the meeting. Veteran of innumerable international conferences, he remained alone in an adjoining room, pacing the floor, his hands clenched. Back and forth, back and forth, he walked, his silvered head bent toward the door, listening for the knock which would mean that the conference was saved or that it had collapsed.

When Mr. MacDonald was informed his face lit up with joy.

At a press interview Cordell Hull, the United States delegation leader, declared that undue emphasis had been placed on temporary currency stabilization and that the United States deems such action now "un timely."

Snow Slide Victim

Find Bodies Of Two Men Lost Since Last February

Field, B.C.—One hand jutting above rock and melting snow had led to discovery of Cris. Dean, 26, and his brother, Joe, 23, lost in Duchesne Pass since last February. The young men, both residents of Banff, Alberta, were trapped in snowdrifts in the pass as they attempted a ski journey from Camp Hector to Field, 30 miles through winding passes. Work parties will leave here to dig the bodies out of the debris.

Discovery of the bodies was made by two Swiss guides, Rudolph Amer and C. Haesler, who were conducting a search of the pass. Searches have been made intermittently since the young men disappeared, a brother Frank, 20, making trips through the area at every opportunity.

Parents of the young men reside at Banff.

Famous Racing Motorist Dead

Sir Henry Birkin Was Victim Of Blood Poisoning

London, Eng.—Despite a desperate battle by doctors, Cyril Sir Henry Birkin, 36, a famous racing motorist, died in a London nursing home from the effects of blood poisoning resulting from burns received in the Tripoli Grand Prix in May.

Sir Henry had been critically ill for three weeks, and three blood transfusions were tried.

He had been one of Great Britain's leading drivers since 1927.

Sir Henry Birkin was born July 26, 1896. He succeeded his father to the baronetcy in 1931. It was created in 1905. He served in the war from 1914 to 1918.

Trouble Over Taxes

Ten People Reported Killed In Riots In Poland

Warsaw, Poland.—Nine persons and one policeman were officially reported killed when police forced peasants to cease beating tax collectors in the Galician districts of Ropcezy, Rzeszow and Lancut. Sixteen persons were seriously wounded. Many arrests were made and numerous peasants escaped to the forests.

Grasshopper Invasion

Winnipeg, Man.—Thirty thousand acres of green crops in Winchester municipality, southwest Manitoba, were threatened with destruction by an invading horde of grasshoppers as western Canada's wheat lands, baked by a searing sun during last week's heat wave, failed to receive the much-needed moisture promised.

Theft From Mint

Ottawa, Ont.—John R. Wallace, a member of the Royal Canadian Mounted Police, pleaded guilty in police court here to stealing \$95 in gold coins from the Canadian mint. He was remanded for sentence.

Honors For Einstein

Brussels, Belgium.—The University of Brussels recently conferred upon Prof. Albert Einstein the title Doctor Honoris Causa of the faculty of sciences.

W. N. U. 2000

Aids To Navigation

To Instal Direction Finding Stations In Hudson Bay Area

Ottawa, Ont.—Paving the way for renewed efforts to reduce insurance rates on the Hudson Bay route, the federal marine department will shortly commence construction of a short wave direction finding station at Chesterfield, on the east shore of the bay, a considerable distance north of Churchill.

Installation of additional navigation lights in the strait will not be undertaken this year. The department has no funds for this purpose and, in addition, further survey work is necessary to determine the precise location of the points at which lights would be erected.

It is necessary to be able to mark all lights on navigation charts with absolute accuracy so that navigators when they see a light may fix their position. Hitherto a detailed hydrographic survey of the north shore of the strait has not been carried out and if lights were built this year only approximate position could be given.

The direction finding station at Chesterfield is deemed the most important contribution to the Bay route that may be made at this time. This station will give cross bearings on the line from Nottingham Island to Churchill. At the present time there are stations at Nottingham and Churchill but bearings are difficult to obtain.

This is the official reaction of the marine department to the annual report of the Imperial Shipping committee on the Hudson Bay route.

Aeroplane Tragedy

Capt. Broatch and Two Mechanics Lose Lives In Air Crash

Prince Albert, Sask.—The first aeroplane tragedy of the year in northern Saskatchewan claimed the lives of three men near the Brooks air base at Emma Lake, 30 miles north of here.

The dead are: Capt. B. W. "Burr" Broatch, pilot, 42, Hiram C. Brooks, pilot-mechanic, 24, T. D. Forsyth, mechanic, 28.

Broatch, well known western commercial flyer, who served with the Royal Navy Air service in France and later with the famous Dover patrol, was testing a reconditioned "Biplane" at a altitude of 2,000 feet. With him were Brooks and Forsyth, mechanics of the Brooks Airways, Prince Albert.

In the middle of their tests the plane dropped in a spin for some unknown reason and plunged into a bay of the lake just north of the air base at 4 o'clock in the afternoon, after the machine had been put into several spins and loops by the pilot. The plane falling into about 10 feet of water, was smashed to pieces and the engine buried in the bottom of the lake.

The bodies of Broatch and Forsyth were recovered shortly after the crash, while Brooks' body had not been recovered. The lake bottom was being dragged for the third body.

Forsyth, mechanic, was scarcely recognizable, while Broatch's head was badly smashed. Brooks was the son of R. D. Brooks, of Prince Albert, president of Brooks Airways.

Lord Montagu Is Fined

Found Guilty Of Common Assault On John Forbes

Victoria, B.C.—Lord Edward Montagu, the second son of the Duke of Manchester, was found guilty of common assault on the person of John Forbes on June 15 and was fined \$20 and \$7 costs, or, in default, ten days in jail, by Magistrate George Jay in provincial police court here. C. W. Brooks, co-defendant, was found guilty of assault causing grievous bodily harm, and was fined \$50 and \$7 costs, or, in default, one month in jail. Montagu's fine was paid and he was freed.

Organization Dissolved

Berlin, Germany.—The Steel Helmet Veterans' organization throughout the Rhineland has been dissolved its offices and homes closed, and other property temporarily seized. The dissolution was said to have become imperative in order to "cleanse the organization of Marxist and Communist elements, as well as bad political leaders, and preserve it as a non-political defence organization."

Gulls Save Crops

Wolfville, N.S.—Farmers who till the soil of the Grand Pre Meadows turned thankful eyes to fields white with the gulls of Pundy—gulls fattening on millions of grasshoppers, which had threatened to ruin the crops.

Review Tariff

Britain Asks Canada To Discuss Duties On Long List Of Articles

London, Eng.—Taking further advantage of the terms of the Canada-United Kingdom trade agreement, signed at Ottawa, the United Kingdom asked Canada to review the Canadian duties on a long list of articles, with a view to revision. The Canadian tariff board is already preparing to review the duties on cotton and textile goods imported from Britain.

The trade pact signed at the Imperial Conference gives each country the right to seek revision in the scale of duties levied by the other on its goods.

Taking Part In Gold Rush

Many Indians Using Sailing Canoes To Reach North

The Pas, Man.—Fleets of sailing canoes, loaded to the gunwales with freight, and manned by Crees, are now drifting ahead of the breezes of the northern lakes, heralding the new summer's gold rush in God's lake.

The purr of the outboard motor is heard right across the hinterland. Even Indians, without the cash to secure outboards, have jumped into the "rush" with canoes, and are swinging paddles, oars and sweeps, as they freight their way into the mineralized zone.

PROPOSAL IS MADE TO REDUCE WHEAT ACREAGE

London, Eng.—The four-power wheat conference adjourned discussions to await statistical information on production from Australia, Argentina, and Soviet Russia after formulating a tentative plan calling for reduced acreage and export quotas.

News of extensive crop damage in Canada and a short crop in the United States caused delegates to believe the final position may be changed materially.

Stanley Bruce, Australian minister to the United Kingdom, asked that the conference produce some concrete proposal which he might transmit to Canberra for consideration of his government.

It was learned the limitation proposal as now constituted contemplates reduction of acreage by 15 per cent. for one year only and that the program for the second year would be decided after the effects of the one-year reduction are seen.

Canada, the United States and Argentina were reported agreed with the Polish stand that small production must be brought into any scheme if disaster is to be avoided.

The Soviet has not been brought into debate yet but some quarters were inclined to the view no enduring solution of the wheat problem would be possible without participation of Russia despite that country's short crop this season.

Limitation of production by way of reduced acreage and the curtailment of exports by a quota system among the nations are the main lines on which the conference is working, while at the same time urgently pleading for some agreement by importing nations on methods whereby they might raise consumption.

The Daily Telegraph said it was informed the world economic conference will begin immediate discussion of a plan for reducing the world's wheat output by 15 per cent. and absorbing the total carry-over in two years.

REPRESENTS CANADA

Dr. Frank D. Adams, Emeritus Vice-Principal of the Faculty of Applied Science and Lecturer of Geology and Paleontology at McGill University, who has been appointed to represent the National Research Council at the International Geological Congress which is to meet in Washington from July 22 to 29.

Default On Payments Bars New Borrowing

New Ruling In United States To Protect Bond Issues

Washington, D.C.—Foreign borrowers, including governments, who default on their obligations to the United States, can borrow no more money within this country by bond issues or other securities according to the specific terms of the new Federal Securities Act, known as the "blue sky" law.

A clause in the new act, passed by congress, stipulates that if the securities "offered" in the United States "in order to make a public authority," such public authority must have "continued the full service of its obligations in the United States" in order to make a public offering of its securities within the republic.

Some other facts interesting to foreign governments or corporations wishing to sell securities in the republic as set forth in the new law follow:

Truthfulness and adequacy of the information furnished to purchasers of foreign securities under the act are made the direct responsibility of U.S. investment houses floating them.

All data relative to the financial status of the government or foreign corporation for which funds are intended to be raised must be furnished by the agents in the United States to the federal trade commission.

Just as domestic securities, foreign securities must be registered with the federal trade commission.

German Jews Need Help

Opinion Of Man Who Investigated Conditions Created By Nazis

New York—Michael Williams, who investigated conditions in Germany for the American committee of the rights of religious minorities, said in an address that Nazi opposition to Jews "far exceeds any other persecution known in modern times."

"If the Jews are to be rescued, if their position is to be ameliorated in any important degree, it is vital that an international body be set up qualified to speak and act for the Jews of the world."

Has Increased Staff

Welland, Ont.—With prospects of a bumper wheat crop in western Canada which would necessitate an increased demand for binder twine, the Plymouth Cordage Company's plant here has taken on an additional 150 men.

Cannot Help Manitoba

Federal Minister Of Trade And Commerce Says There Is No Co-Operation

Winnipeg, Man.—"The Dominion Government cannot help Premier Bracken to finance provincial unemployment and other money issues because he will not play the game with us," Hon. H. H. Stevens, Federal Minister of Trade and Commerce, said in an interview here.

"During the past three years," he continued, "the Dominion Government has earnestly tried to co-operate with the four western provinces. In three provinces they have been successful, but in Manitoba no reciprocal co-operation was forthcoming."

"Not once but repeatedly Mr. Bracken has used the unemployment financing issue for political purposes, which makes it difficult for the Dominion Government to assist the province. I do not think Mr. Bracken has made the efforts which he could have made to handle the relief question."

Predicts Stratosphere Flights

New Type Airplanes Will Make This Possible Says Piccard

New York.—Professor Auguste Piccard, arriving from Europe, said that on the strength of his studies during his 10-mile balloon ascension, aeroplanes are being built with airtight steel cabins to make possible flights in the stratosphere.

"These planes should go between 450 and 500 miles an hour," he said. "They will have little resistance because the air at that altitude is so light."

"Once the plane reaches such an altitude the pilot can set the course and cross from America to any point in Europe in a few hours."

Piccard will go to Chicago, where he will advise preparations for the stratospheric balloon flight of his twin brother, Jean Piccard, and Commander Settle of the United States navy.

STABILIZATION OF CURRENCY BONE OF CONTENTION

London, Eng.—Prime Minister J. Ramsay MacDonald, chairman of the World Economic Conference, was said to be seeking elimination of the monetary stabilization question which constitutes the bone of bitter contention at the parley.

The French delegation failed to carry out threats of demanding adjournment of the conference until the United States dollar should be stabilized, but the feeling of anxiety over the problem continued intense in conference quarters.

Quarters were clearly disturbed by the solid lining up of many countries opposed to dollar instability and it was unofficially pointed out in comment that one of the chief points of the Washington program was stabilization as soon as practicable along the lines laid down in the resolution submitted by Senator Key Pittman.

A succession of speakers pleaded for monetary stabilization as essential to restoration of confidence, including representatives of Italy, Switzerland, Poland, Norway, Germany, Rumania and Yugoslavia.

The discussion awoke during consideration of a British resolution calling for easy money and cheap credit policies.

The conservative gold standard countries doubted the feasibility of the program and warned of its possible dangers.

RESENTS TARIFF BRITAIN IMPOSES ON FREE STATE

London, Eng.—The Irish Free State quarrel with the United Kingdom arising from the nonpayment of the land annuities was brought before the world economic conference in an attack on the practice of imposing punitive tariffs.

The United Kingdom-Irish Free State tariff war was brought to the notice of the conference by Senator Joseph Connolly, Free State Minister of Lands and Forests, in a blunt speech before the private meeting of the sub-committee on commercial policy.

After dealing with the causes of the quarrel as the Irish Free State saw them, Senator Connolly turned to the "punitive tariff" which Great Britain was imposing against Free State goods.

"You will appreciate," Senator Connolly told the sub-committee, "how foolish it would be for our delegation to go on laboring towards a solution of tariff problems and restoration to 'normal conditions' in the interests of world economic peace without having this unique special punitive tariff policy, which is being applied to one of the weaker countries by one of the great world powers, brought to your notice."

Marine Insurance Rates

Expect Lower Rates May Be Obtained For Bay Route

Ottawa, Ont.—The report of the imperial shipping committee in which it found that the insurance rates on hulls and machinery on ships trading into Churchill could not be reduced this year, but the minimum rate was extended to apply to ships leaving Churchill as late as Oct. 7, instead of the previous limit of Sept. 30, was made public today by the department of marine.

The report appeared to be optimistic that lower rates might prevail in subsequent months might of the Hudson Bay route were demonstrated.

The report considered at length the ocean traffic into Churchill during the 1932 season when 10 cargo vessels made the passage through Hudson Straits and into Churchill. Nine made successful voyages and one, the "Bright Fan," was a total loss after striking an iceberg.

Reference was made to the former report in which the committee explained that "as long as there are only a few voyages in the season, a single casualty may quite likely absorb the whole or more than the whole of the money received by way of premium."

Forest Fires In Ontario

Swept Over Fifteen Miles Stretch Near Fort William

Fort William, Ont.—Only partially checked by a sudden shift in the wind, a raging forest fire was defying efforts of 200 rangers and firefighters to quench it. It swept over a 15-mile stretch of cut-over timberlands, near Poland, 85 miles west of here.

Lesser fires are burning at several places in the eastern section of the Thunder Bay district, causing considerable damage, and all available men in the area were drafted to fight them.

A Canadian National Railways bridge was destroyed near Hornepayne, temporarily cutting off communication between Long Lac and Fort Arthur.

Brighter Outlook

Twenty Thousand Men Added To Industries In The East

Winnipeg, Man.—Saying that in May alone 20,000 men had been added to industries in the east and that in his trip through the west he had found hundreds of new men employed in mining, lumbering and manufacturing, Hon. H. H. Stevens, Minister of Trade and Commerce, said trade and commerce in the Dominion was encouraging. "Transportation is decidedly brighter," he said. "Carloading and passenger transportation both show marked improvement. Cattle are moving well and 40,000 head will be shipped to Britain this season."

Was Friend To Animals

New York.—The animals would be sad if they could understand, Harry Daniel Moran, head of the Humane Society of New York, who spent 18 years helping suffering beasts, is dead.

DISTINGUISHED FIGURES IN WORLD CONFERENCE

Canadians occupy a prominent place in the World Federation of Education Associations which is to hold its fifth Biennial Conference in Dublin, Ireland, this month. It will bring together outstanding educational leaders from forty or more countries with the object of cultivating and developing international good will, and exchanging views on educational matters. The Dominion is represented by Harry Charlesworth (centre), Vancouver, B.C., as vice-president of the organization; Dr. E. A. Hardy (right), Toronto, as Treasurer, and Dr. D. D. MacDonald (left), Toronto, a member of the board of directors.

Tragedy Follows Buddha Idols

Unassigned Letter With Images Says They Possess "Evil Influence"

Two wooden images of Buddha and a stone reproduction of the god have left a trail of disaster in the homes of three London business men who in turn became their owners. None of the three men believes in superstition. Yet in each case they have been the victim of strange ill-fortune.

"Within three days of the idols being placed in the sitting room of his home in south London," said a friend to a London newspaper representative, "the third man was struck down by a severe and little-known malady."

"He is engaged in the insurance business, and is noted for his hard-headedness. He had been warned of the evil influences exerted by the idols, but had laughed at the idea."

The first two men who owned the idols for a while had ample evidence of their uncanny power to bring trouble in their train.

"Victim number one is a city man with offices in Bishopsgate. One day, the parcel containing the images of the god arrived at his office from an unknown source. He was on an Atlantic holiday cruise at the time."

"Yet on that day he was struck down with pneumonia. When he finally reached home his office was burgled—but the still unopened parcel was not touched."

"In the parcel was an unsigned letter, which stated that the images possessed 'an evil influence,' but no explanation was given why they had been sent to him."

"He consulted a famous medium, who said that the idols were Chinese, and belonged to the Ming period. She begged him to rid himself of them by throwing them in deep water."

"A few weeks later he gave them to a friend, having previously told him their history. He friend laughed, but three days later he was taken to hospital, having lost his memory and collapsed in the street."

"Now a third man has paid the penalty of possessing the idols—he was taken to a nursing home—and his wife is terrified lest further disaster shall come to the house, where the idols now are."

Mysterious Old Man

Ontario Motorists Telling Stories Of Eerie Experiences

Here's another story of the mysterious old man who, when picked up on the road, converses for a while and then disappears mysteriously from the back seat as the car pulls along at 50 and 55 miles an hour.

A Waterloo, Ont., motorist wrote it happened. Another at Galt became angry when friends doubted the story. A Kitchener lawyer now tells the tale.

He was driving along when he met the old man with the patriarchal beard. The car stopped. The old man got in the back seat.

"Well," the driver said, "times are pretty tough on you, eh?"

"They are," the old man replied. "But the depression's over, mark my words. It ended on June 7."

The driver chuckled. "You seem to know."

No answer from the rear seat.

"I say," repeated the driver in a louder tone. "You seem to know."

Still no reply. The driver looked around. The rear seat was empty.

A Unique Ship

Motorists following the Lincoln Highway through the Allegheny Mountains, east of Pittsburgh, United States, are amazed to find a "stensthip" perched on the side of a mountain at one point where there is a particularly fine view of the surrounding country. The structure is a hotel and restaurant, built in the form of a boat, and stands at an elevation of 2,464 feet. From its deck tourists look into three states and seven countries.

Noted Architect Dead

Frank Worthington, Simon, architect who designed Manitoba's Legislative Buildings, and Fellow of the Royal Institute of British Architects died at Mentone, France, May 19. Other famous buildings designed by Mr. Simon include the Edinburgh International Exhibition and the Liverpool Cotton Exchange.

Meat is made up of small fibres about 1,750 to 1,400 of an inch in diameter, and up to about 1½ inches long.

"What would you do if you got a rich wife?"

"Absolutely nothing."

W. N. U. 2000

BRITAIN'S FLYING DAREDEVILS EXECUTE DIFFICULT STUNT

Our press photographer was fortunate to catch this trio of Royal Air Force 'planes as they shot into the air tied together with cords to perform a series of breath-taking stunts. The daring pilots were putting on their show as part of the Royal Air Force Pageant at Hendon, England.

Strange Tribe Discovered

Unknown Aboriginal Village Found On Island Of New Britain

Two hitherto unknown aboriginal villages, where widows insist on being strangled to death, have been discovered on the island of New Britain.

Patrol Officer H. R. Niall, of the New Guinea police came upon the villages while on an expedition across the island which lies to the east of New Guinea.

When a villager dies his widow demands death by strangulation in order that her spirit may be freed to join his. Officer Niall says, in a report to the Australian government.

"On some occasions the men, being afraid of consequences, have refused to strangle a woman," the report continues.

"Then it sometimes happens that the widow takes off her grass skirt and hands it to the men, telling them to put it on and saying that they are only women and not real men. This she shames them that they reluctantly kill her according to custom."

Consummation of the weird ritual is the duty of the widow's brother or her nephews who wind a native bary cloth around her neck and tighten it until she is choked.

Germany's New Rail Bus

Is To Be Tried Out By Long Island Railroad

The Long Island Railroad, one of the world's biggest carriers of suburban commuters, plans to try out a new type of railbus brought for the Chicago Century of Progress Exposition from Germany. The bus, made by the Austro-Daimler-Puch Works, is 28.6 feet long, seven feet eight inches wide and eight feet eight inches high. It is propelled by two 80 horsepower motors and develops a top speed of 90 miles an hour.

The car has double control and may be operated from either end. It has a double set of wheels, one of rubber and one of steel, the former being on the inside. It was explained that the rubber wheels carry the weight of the car while the machine itself is directed by the steel wheels just as a locomotive is guided automatically by the rails. The rubber and steel wheels are on distinct axles.

With the car when it arrived was Oskar Hacker, chief engineer of the company which built it, and Josef Mansfelder, chief mechanic. Herr Hacker said six of the buses were now in use in Austria, two in Poland and several are now being shipped to Ecuador. They weigh 20,800 pounds and accommodate 42 passengers.

Sweden Misses "Singing Count"

Original Character Of Stockholm Was Worshipped By Poor

The "Singing Count," one of the most popular and original characters of Stockholm, died in his home recently. Count Magnus von Rosen undoubtedly enjoyed greater popularity amongst rich and poor than any other public figure in Stockholm. He was a Bohemian aristocrat, always dressed with the most elaborate elegance, a man about town who would be seen daily leisurely walking along the most fashionable thoroughfares or in the midst of his friends in some popular restaurant or cafe. He had a pleasant voice and received his nickname from his habit of singing aloud in the streets as he walked along and late-night wanderers would often hear his gay echoes through the empty streets.

He was worshipped by the poor for he would always stop wherever he saw some one in need to give him one of the one-crown pieces with which his pockets were filled accompanied by some cheerful and friendly words. As a young man Count Magnus travelled for years in many parts of the world, including Australia, America and the East. He returned and settled down for good in Stockholm, which he loved more than any other place, and where he spent his time in making friends and in spreading the sunshine of his kind heart and gay wit along his path. The Stockholm press and public mourn him as one of the best representatives of the "good old days" and regret that the gay voice of the "Singing Count" has ceased to echo through the streets of "The Venice of the North."

Crossed Channel On Surf Boat

London Man Towed Across From Dover To Calais

Captain D'Arcy Rutherford, of London, who has crossed the English Channel from Dover to Calais on a surf boat towed by a speed boat, says he held a low-rope which was fastened to a speed boat driven about 13 miles an hour. He reached Calais in an hour and 40 minutes. The time would have been less, but they hit the wash of a big steamer, and several times Captain Rutherford had to lie flat to avoid being thrown over. The cold was intense, as he was wet through and wore only shorts and a sweater.

"I've just been having a tussle with the dentist."

"Which best?"

"It ended in a draw."

Killorglin Still Holds

Annual Goat Festival According To Tradition Animal Saved Town From Cromwell Invasion

The rolling, heather-clad hills surrounding Killorglin are being combed for the largest of myriad goats which ramble freely and quantitatively in this corner of Ireland. For this little town, probably the only place in the world which pays tribute to the scavenging animal, is preparing for its annual enthronement of Mr. Goat, alias "Puck."

Tradition has it that Cromwell's ironies once marched across these fabled summits intending to attack Killorglin town. But their glittering shields reflecting the sunlight sent a pack of wandering goats stampeding through the streets and warned the townsfolk of approaching danger. The defence prepared surprised the attackers and frustrated their plans.

Since then "Puck," as the goat is called there, has been venerated by an annual fair in his honor. Early in August the largest goat procurable is enthroned on the public square upon a platform gay with evergreens and bunting. Emerald ribbons flutter from his horns and surrounded by the food most to his taste, he reigns for three days.

For miles around all roads lead to Killorglin. Killarney, near by sends its quota of tourists from many lands. Money is freely spent; every house becomes a hotel.

Each night "Puck's" throne is illuminated by colored lights and the people join in merry dancing. Late on the evening of the third day "Puck" is taken from his platform by a group of stalwart young fellows, headed by the town bell man and is carried from door to door while tribute is demanded from each inhabitant. The goat is then auctioned off by the bell man. All expenses involved by "his majesty's" reign are paid for out of the fund thus collected and the remainder given to the town bell man.

Highway Bridge Joins Venice To Mainland

People Afraid Motor Traffic Will Disturb City's Peace

Venice, pearl of the Adriatic, has lost its long isolation with the construction of a highway bridge to the mainland, two and a half miles away. Residents of the City of Lagoons saw automobiles invade Europe's "most serene republic" for the first time. Many of the older residents had never seen an automobile before.

The new bridge, built at a cost of \$4,500,000, parallels the Ponte Sulla Laguna, a railroad bridge built 87 years ago. Some Venetians fear the advent of motor traffic will disturb the peace of the old city. The gondolier, and its chauffeur, the gondola, is bound to stay, however, as there are still many unbridged canals dividing the centre of Venice from the outlying parts.

Hostels For Hilcers

Youth hostels are rapidly being opened in Scotland for the benefit of young hilcers. They can stay overnight for a nominal pension and prepare breakfast in the morning. In 1931 there were nine hostels. Last year there were ten more and already in 1933 the total had reached thirty-two. In the first year 3,129 "bed-nights" were recorded and last year the total had risen to 22,336, which figure is expected to be far exceeded in the present season.

The French West Indies report that 1932 was a prosperous year there.

British ships earned \$260,000,000 in the last year.

International Gang Of Spies Operating

Industrial Espionage As Well As Naval And Military

Espionage is no longer merely a matter of one country creating an organization for ferreting out the military and other secrets of its neighbors, French secret service authorities declare.

It is now, in fact, rapidly passing into the hands of a sinister international body with branches in every important centre. This syndicate has no national prejudice.

It is organized entirely on commercial lines and makes its business the collection of all information regarding the naval, military and aerial defences and preparations of the different countries.

Its information is at the disposal of any nation willing to pay for it, and it is known that in many cases the usual secret service agents of different countries have found it easier to buy their information from this syndicate.

According to the French authorities the head of the organization is an Englishman, but his lieutenants are men of all nationalities, and a number of women are employed as directors, whilst hundreds of "correspondents" are retained in different countries.

A branch concerns itself with industrial espionage, collecting and disseminating information about new industrial processes, and selling this to trade rivals of the firm concerned.

It has been proved conclusively that several suspected spies dealt with by the French courts recently on the assumption that they were employed by this syndicate, and the information they gleaned was passed on to at least three other European powers interested in French defence problems.

Parachute Jumper Makes Contribution To Science

Proves Consciousness Not Lost When Falling From Great Height

A parachute jumper in England created a record recently when he deliberately delayed opening his parachute until he had fallen a distance of over four miles. Then he landed quite safe and with all his wits about him.

This was a marvellous achievement and was performed, not as a sensational "stunt," but as a contribution to science. People sometimes say that because a man fell from a great height he would be dead before he reached the ground, but this demonstration proves that there is almost no limit to the possible height which a human being may attain and fall to the ground fully conscious.

In this experiment the parachutist tumbled over and over, sideways, head first and feet first, at a speed which reached 150 miles an hour, yet he not only remained conscious until he opened his life-saver, but kept his head clear and was able to put the cord at a chosen moment.—St. Thomas Times-Journal.

Challenge To The Girls

Preacher Says They Do Not Fit In With Higher Education

The modern girl doesn't fit into the picture of higher education, according to Rev. Neil Herman of Halifax, Nova Scotia, who says the feminine mind cannot grasp many college subjects.

"You cannot fit the girl of this generation into the picture and have anything else but a puzzle," he declared in a sermon on "Our Latest Puzzles."

"The girl who is called upon to tackle the entire program of study becomes a radical in some form or other," he continued. "Hundreds of thousands of them pass examinations but they don't swallow half what they read or what they are taught."

Where Women Are Barred

British women are not permitted to hold office in the diplomatic and consular services as ambassadors or consuls, nor may they hold the higher administrative posts in the three Defence Departments on the ground that they are not liable to military service.

Most Important

"You will find that this motorcar is the best argument you can have in proof of your prosperity," said a salesman.

"If that is true," said the prospective purchaser, "what I now to know is, shall I always be able to drive that argument home?"

Canada is the largest exporter of newspaper in the world.

W. J. Gallagher Chinook

Heard Around Town

Dr. Esler will have a clinic for the removal of tonsils and adenoids on July 4th, at the Cereal hospital. 10 21

Mrs. M. C. Nicholson spent the week end at the home of Mr. and Mrs. W. Anderson, of Heathdale district.

Mrs. Smith and little grandson, of Cereal, visited with her daughter, Mrs. Harold Stewart, over the week-end.

A. J. Mumford moved last week into the house owned by Mrs. J. Massey.

Andrew Carlson, of Wainwright, purchased the farm just north of town from H. T. Lensgraf.

Mrs. H. Johnson, of Cereal, is visiting for a few days at the home of her brother, A. V. Brodine.

Mr. H. Synnuck, of Wastina, was a Chinook visitor on Monday.

Mrs. Annie Anderson and little son, of Portland, Oregon, arrived here last week and will spend the summer months at the home of her parents, Mr. and Mrs. Ole Rudy, of Peyton district.

Geo. Thompson and J. Coutts cut for J. M. Davis, of Coltholme district, 100 acres of beautiful rye, which he will use for feed for horses and cattle, last week. Mr. Davis expects to get another crop of rye seed from this same field this fall, providing we get rain.

The mixed baseball team consisting of the young people belonging to the Peyton district met on Saturday afternoon at the Peyton school. The people of the district gathered to watch the game until about 7 p.m. when lunch was served in the school. After all partook of a fine lunch, also enjoyed a friendly visit, dancing began, lasting until about 12 p.m.

The following are the names of the delegates who attended the U. F. A. Convention at Hanna on Saturday, June 24: Lorne Proudfoot, M. L. A., S. W. Warren, J. Haggarty, H. Smith and Ray Robison.

John McKinnon, who has been an inmate of the Calgary hospital for the past four months, returned to his home

here feeling much improved in health.

The regular meeting of the Chinook Women's Institute will be held Thursday, July 6th at Mrs. J. C. Turple's home. The assistant hostesses will be Mrs. R. Stewart, Mrs. W. Davis, Mrs. G. Hutchison and Mrs. E. Pfeiffer. A social afternoon is planned, friends and visitors being welcome. Each one please bring a favorite recipe.

The following were visitors at the home of Mr. and Mrs. A. E. Jacobson, of Heathdale, on Sunday, June 25th: Mr. and Mrs. J. L. Maloney, Mr. and Mrs. Philaja, B. Maloney and son and Alva and Ray Philaja, en route to the World's Fair at Chicago. They will also visit relatives at Springfield, Illinois.

Saturday, July 1st, will be public holiday.

An open air service will be held at the home of Mr. James, who lives five miles straight west of Cloverleaf school, on July 2nd. Mr. Aberhardt, of Calgary, will send out two speakers. The first one speaks at 3 p.m. and the other at 7 p.m. Every one takes lunch.

Mr. Langley has been ill and confined to bed for a few days this week.

C. E. Neff, of Hanna, was a town visitor this week.

On Friday evening of last week at 9:30 70 friends of the newly wedded Mr. and Mrs. E. C. Pfeiffer gathered, equipped with every conceivable article that would make noise, outside the residence of N. Murray where the bride and groom were quietly enjoying a game of bridge. Suddenly the charivari began when the newly-weds arrived on the scene and were driven to the Chinook hotel ballroom in the Chinook mail chariot drawn by two prominent ladies of the town. Mr. and Mrs. Harold D. Stewart, who were recently married, were also entertained. The evening was spent in dancing. At the close a very dainty lunch was served. A. V. Youell, toastmaster, called on M. L. Chapman for a speech, who expressed for the community their good wishes and welcome to the two couples. Mr. and Mrs. E. C. Pfeiffer were then called to the platform when Mr. Pfeiffer

thanked the audience, expressing their appreciation. Mr. and Mrs. Stewart also were called up when Mr. Stewart in a few words expressed their appreciation. The party concluded by forming a circle, all joining hands, with the two couples in the center, and sang "Auld Lang Syne" and "They are Jolly Good Fellows."

What might have proved to be a very serious accident happened to Phyllis Marr, third daughter of Mr. and Mrs. Russell Marr. After returning from school she went to put her pony away. When the family came in for supper she was absent. She was found laying on the ground in the barnyard in an unconscious condition. She was taken to Dr. Esler, of Cereal, and it was several days before she fully regained consciousness. At time of writing she is improving nicely. It is unknown how the accident occurred.

R. D. Vankook and family moved on Tuesday into the house owned by Mrs. M. C. Nicholson.

Lionel Dressel, son of Mr. and Mrs. L. Dressel, who broke his arm some time ago, has had to have the limb reset.

Just when the farmers in this district were almost at the point of despair for lack of rain a slow rainfall started Wednesday night, continuing until going to press, still raining Thursday.

The Ladies' Card Club met Tuesday evening at the home of Mrs. E. E. Jacques. Mrs. Clarence Petersen won the first prize and Mrs. Jacques the consolation. The club meets next week at the home of Mrs. P. Petersen.

U.S. Will Widen Inflation If Recovery Halted

(By United Press in Calgary Herald)

Washington, June 26 — The administration will make further use of its inflation powers if more than a temporary interruption occurs in the current upward movement of business, the United Press learned in official quarters Monday.

Annual U.F.A. Church Service

On Sunday, June 25th, the annual devotional service of the U.F.A. was held at Forkner's Grove where over 400 people met. Following is the program—namely: Mr. H. Smith, chairman, called on Mr. Stanley Rands, B.A., of the United Church, Chinook. Next speaker was Rev. Mr. Faulk, of the Coltholme Nazarene Church. The last speaker being Rev. Mr. Parks, Anglican preacher, of Youngstown. The preaching was interspersed with selections by the Red Deer Male Quartette. The whole service was much appreciated by all present. At the close all sat down to a fine supper in the form of a picnic.

Heathdale Happenings

A meeting to re organize for the Old Timers' Reunion was held at Forkner's Grove and the following officers and committees were elected: L. Setterington, Hon. President; J. L. Ferguson,

India Supports U.S. Silver Proposal

(By Associated Press in Calgary Herald)

London, June 26.—India indicated to the World Economic Conference today her willingness to co-operate in the rehabilitation of silver, as projected in the resolution of Senator Key Pittman.

President; J. H. Robison, Vice President; Edwin B. Allen, Secretary-Treasurer. Grounds Committee: W. Gingles, S. N. Brown, W. Shier, W. W. Wilson and C. Davies. Sports Committee: G. Trigen, R. Gordonier, A. J. Mumford, B. J. Ferguson, W. E. Anderson and J. Rasmussen. Coffee Committee: J. L. Ferguson and E. B. Allen. Finance Committee: C. W. Rideout and E. B. Allen. It was decided to hold a Re-union at Forkner's Grove, N. W. 19, 27, 7, 44th, on July 19th. Every body welcome. Bring your lunch basket and spend the day. Coffee will be served by the committee in charge.
